

DNV Academy Calendar

Courses in spring 2010

DNV Academy shares with you the knowledge, insights and experience that we have gained in our daily work practice. The training offered by DNV Academy has impact. All our courses and programmes are delivered by experts in their field.

DNV Academy: training with impact, knowledge for use offers the following courses:

Information Technology (IT)

IT, a critical success factor for organisations, giving crucial competitive edge. DNV Academy supports you in developing the knowledge and skills needed to optimally exploit the possibilities of IT. With a broad and comprehensive portfolio of IT training services for professionals and organisations with a desire to continuously learn and develop.

Knowledge management

Knowledge is critical to the competitive strength of organisations. Which knowledge, now and in the future, is crucial to your organisation? And as a next step, how do you develop an adequate knowledge management system? DNV Academy offers you the methods and techniques.

Management systems

The human factor is key to successfully controlling risks. The management system training services offered by DNV Academy focus on human competence and drive changes and improvements. We assist you in addressing changes and help you maintain and improve your management systems.

Maritime

The demand for improved surveys and maintenance of ships is high. This can only be met if all parties involved are willing to share knowledge. DNV is aware that company's employees are the most valuable, and yet also the most critical assets. For this reason, DNV is active as a global provider of both off-site and on-site training courses delivered by expert trainers.

Energy

DNV has extensive experience in offering training courses on management systems and risk management for the energy sector. Our target audiences in this sector include board members, SHEQ managers, prevention consultants, environmental coordinators and process engineers.
