

Invitation

Strength Assessment Seminar
26 October from 13:30–19:30

DNV Rotterdam, Zwolseweg 1, 2994 LB Barendrecht, The Netherlands

DNV Software is pleased to welcome you to a seminar on modeling and strength analysis of ship and offshore structures using our software products. We will share with you the cutting edge technology within strength analysis and focus on the latest advances within the Sesam suite of programs. Sesam interfaces with Nauticus Hull for Rule checks according to CSR and 1A1 etc.

AGENDA

- 13:00 Registration & Coffee
- 13:30 Welcome & Introduction
- 13:45 Strength assessment of ship and offshore structures
- 14:15 Efficient engineering of topside structures
- 15:00 A typical crane pedestal analysis
- 15:30 Break & Coffee
- 16:00 Advanced surface modelling of hull forms
- 17:15 Shell element versus beam analysis
- 18:00 Drinks Reception. Take the opportunity to talk with DNV Software's representatives and network with other representatives in an informal gathering
- 19:30 Close

The analysis examples are based on the needs for local and global analysis of ship and offshore structures both for the purpose of new developments as well as for modification work.

Who should attend

The seminar is free and open to all, however some basic knowledge within the field of structural strength assessment is recommended.

Registration

Register within 15 October 2010 on www.dnvsoftware.com/events
